Improved Current Mode PWM Controller

FEATURES

- Pin-for-Pin Compatible With the UC3846
- 65ns Typical Delay From Shutdown to Outputs, and 50ns Typical Delay From Sync to Outputs
- Improved Current Sense Amplifier With Reduced Noise Sensitivity
- Differential Current Sense with 3V Common Mode Range
- Trimmed Oscillator Discharge Current for Accurate Deadband Control
- Accurate 1V Shutdown Threshold
- High Current Dual Totem Pole Outputs (1.5A peak)
- TTL Compatible Oscillator SYNC Pin Thresholds
- 4kV ESD Protection

DESCRIPTION

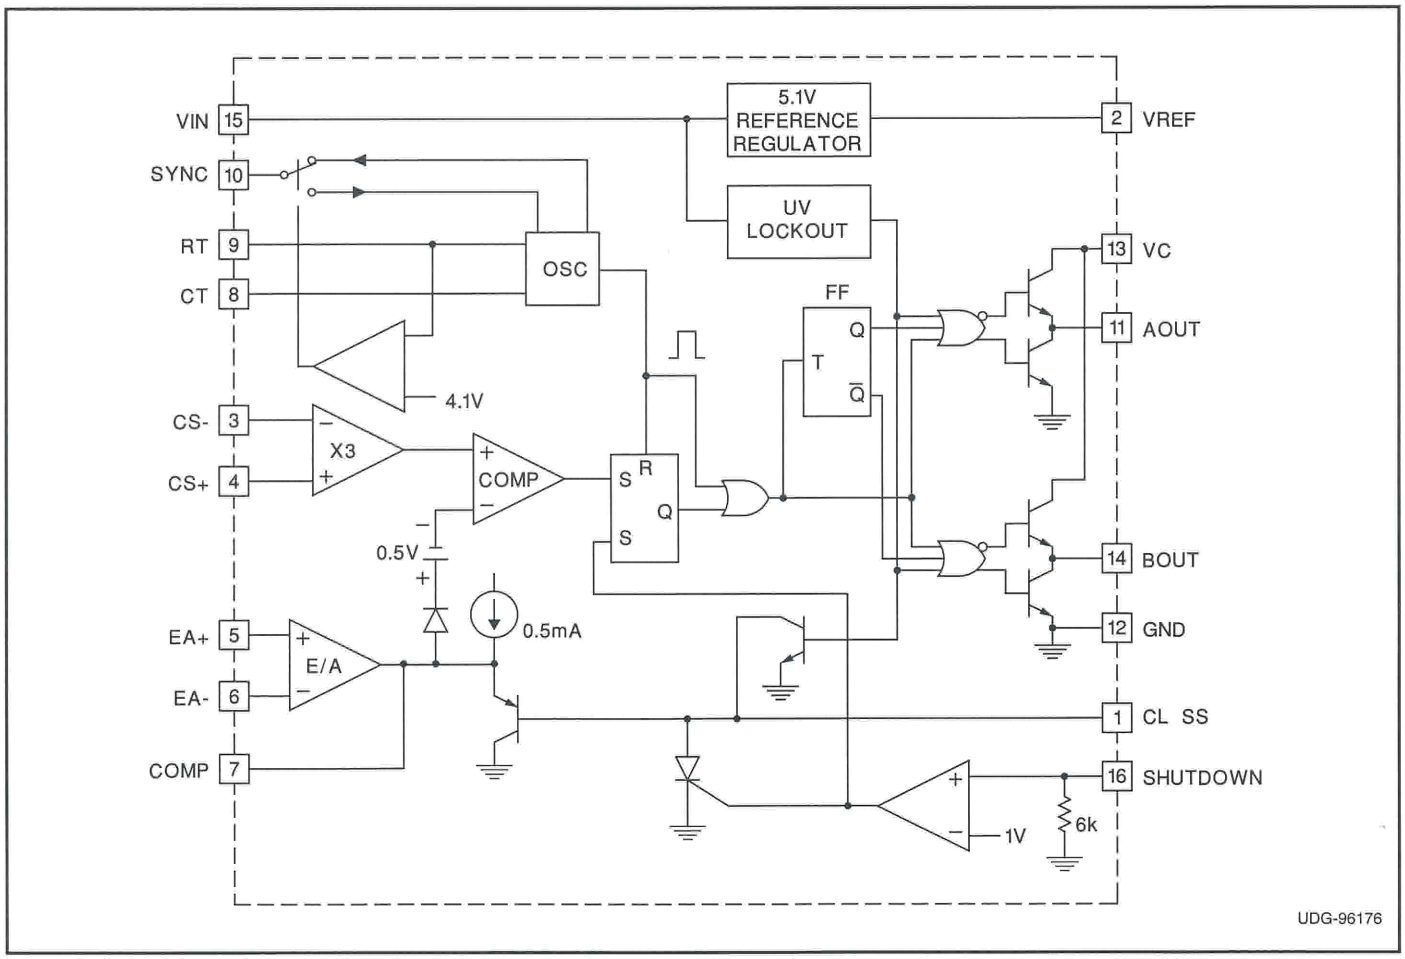
The UC3856 is a high performance version of the popular UC3846 series of current mode controllers, and is intended for both design upgrades and new applications where speed and accuracy are important. All input to output delays have been minimized, and the current sense output is slew rate limited to reduce noise sensitivity. Fast 1.5A peak output stages have been added to allow rapid switching of power FETs.

A low impedance TTL compatible sync output has been implemented with a tri-state function when used as a sync input.

Internal chip grounding has been improved to minimize internal "noise" caused when driving large capacitive loads. This, in conjunction with the improved differential current sense amplifier results in enhanced noise immunity.

Other features include a trimmed oscillator current (8%) for accurate frequency and dead time control; a 1V, 5% shutdown threshold; and 4kV minimum ESD protection on all pins.

BLOCK DIAGRAM



ABSOLUTE MAXIMUM RATINGS

Supply Voltage . . . . . +40V
Collector Supply Voltage . . . . . +40V
Output Current, Source or Sink
DC 0.5A
Pulse (0.5µs) 2.0A
Error Amp Inputs . . . . . –0.3V to +V_{IN}
Shutdown Input . . . . . –0.3V to +10V
Current Sense Inputs . . . . . –0.3V to +3V
SYNC Output Current . . . . . ±10mA
Error Amplifier Output Current . . . . . –5mA
Soft Start Sink Current 50mA
Oscillator Charging Current 5mA
Power Dissipation at T_A = 25°C (Note 2) 1000mW
Power Dissipation at T_C = 25°C (Note 2) 2000mW
Junction Temperature . . . . . –55°C to +150°C
Storage Temperature Range . . . . . –65°C to +150°C
Lead Temperature (Soldering, 10 sec.) . . . . . +300°C

All voltages are with respect to Ground. Currents are positive into, negative out of the specified terminal. Consult packaging section of databook for thermal limitations and considerations of package.

Total Standby Current								
Supply Current			18	23		18	23	mA

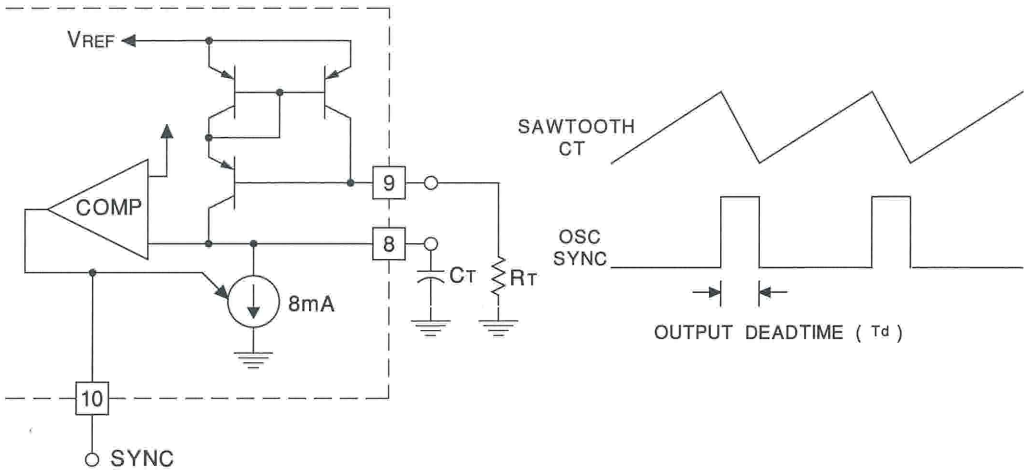
Note 1: All voltages are with respect to GND. Currents are positive into, negative out of the specified terminal.
Note 2: This parameter, although guaranteed over the recommended operating conditions is not 100% tested in production.
Note 3: Parameter measured at trip point of latch with V_{EA}+ = VREF, V_{EA}– = 0V.
Note 4: Amplifier gain defined as:

$$G = \frac{\Delta V_{COMP}}{\Delta V_{CS}+}; \quad \Delta V_{CS}-=0V\,TO\,1.0V$$

Note 5: Current into CL SS guaranteed to latch circuit into shutdown state.
Note 6: Current into CL SS guaranteed not to latch circuit into shutdown state.

APPLICATIONS INFORMATION

Oscillator Circuit



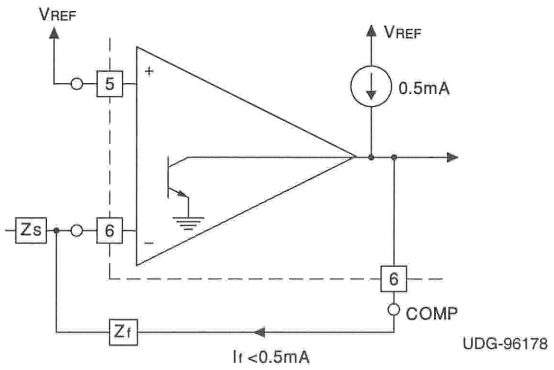
Output deadtime is determined by size of the external capacitor, C_T, according to the formula: $Td = \frac{2C_T}{8mA - \frac{3.6}{R_T}}$

For large values of R_T: $Td = 250C_T$

Oscillator frequency is approximated by the formula: $f_T = \frac{2}{R_T C_T}$

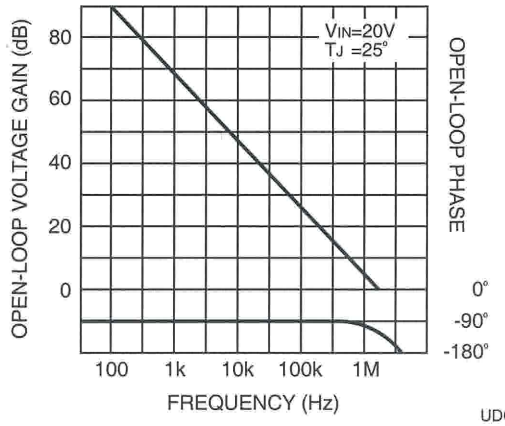
UDG-96177

Error Amplifier Output Configuration



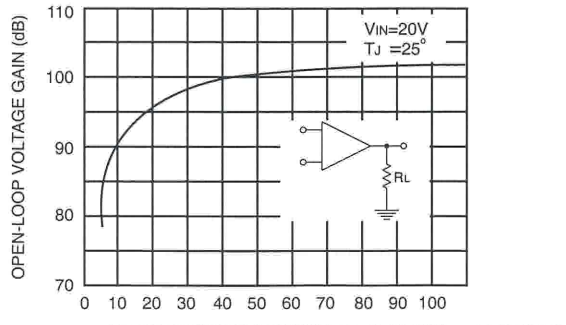
Error Amplifier can source up to 0.5mA.

Error Amplifier Gain and Phase vs Frequency



UDG-96179

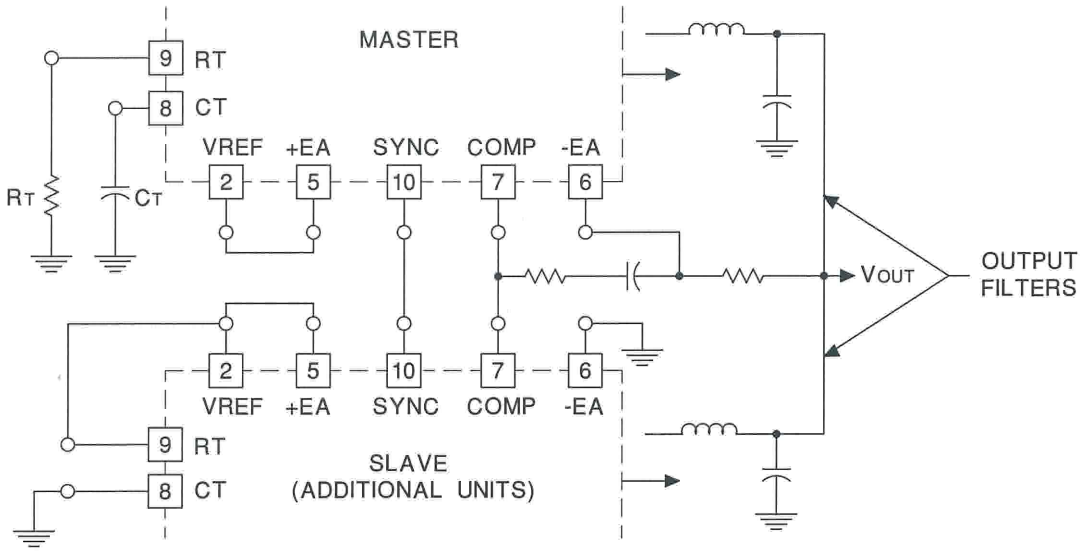
Error Amplifier Open-Loop D.C. Gain vs Load Resistance



UDG-96180

APPLICATIONS INFORMATION (cont.)

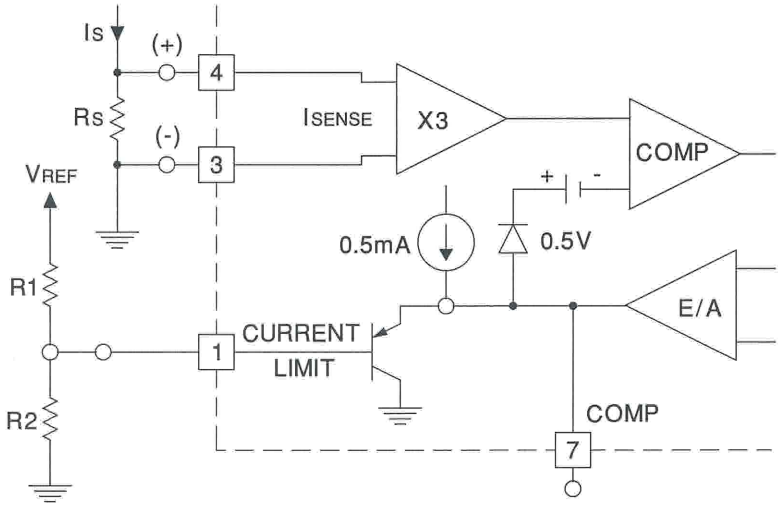
Parallel Operation



UDG-96181

Slaving allows parallel operation of two or more units with equal current sharing.

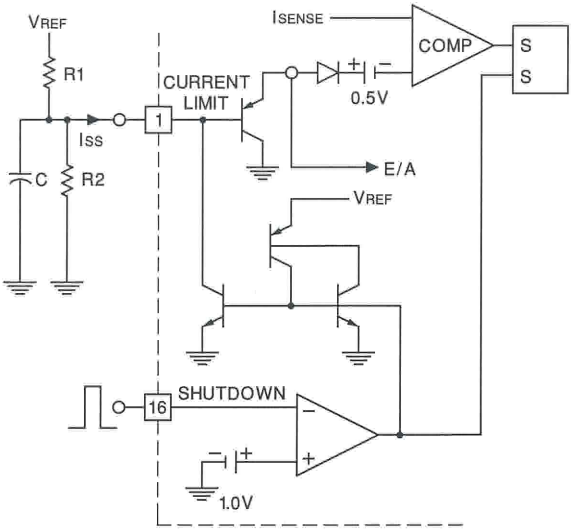
Pulse by Pulse Current Limiting



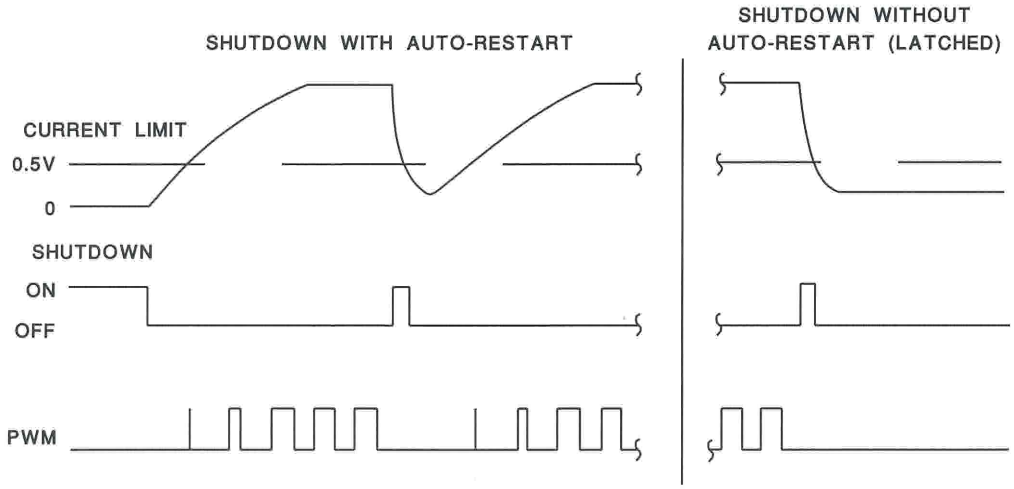
UDG-96182

Peak current (Is) is determined by the formula: $Is = \dfrac{\left(\dfrac{R2V_{REF}}{R1+R2}\right) - 0.5}{3R_S}$

APPLICATIONS INFORMATION (cont.)



UDG-96183

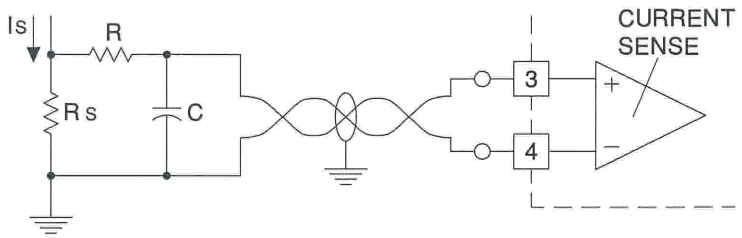


UDG-96184

If $\frac{V_{REF}}{R1} < 0.8mA$, the shutdown latch will commutate when $I_{ss} = 0.8mA$ and a restart cycle will be initiated.

If $\frac{V_{REF}}{R1} > 3mA$, the device will latch off until power is recycled.

Current Sense Amplifier Connections

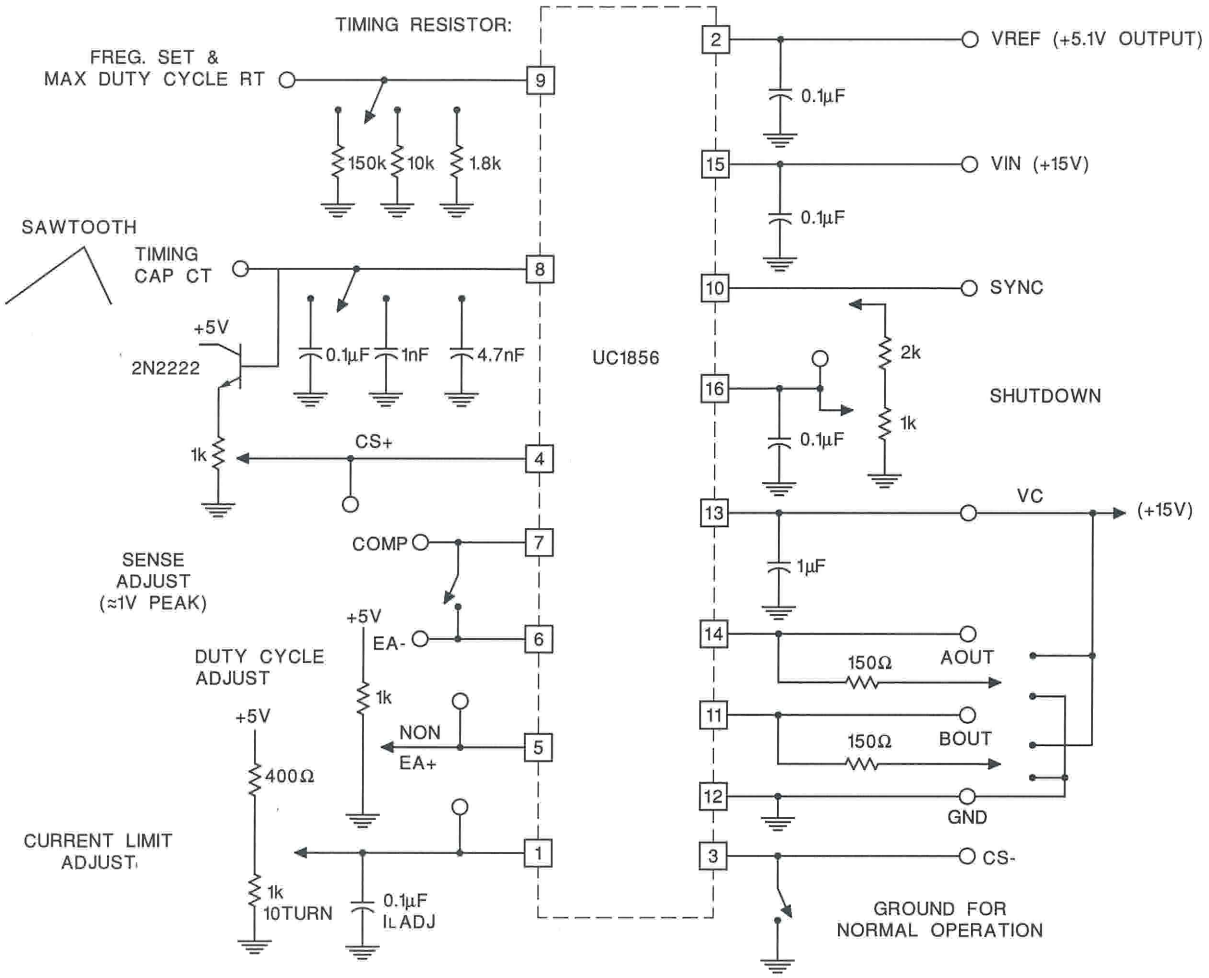


UDG-96185

A small RC filter may be required in some applications to reduce switch transients. Differential input allows remote, noise sensing.

APPLICATIONS INFORMATION (cont.)

UC1856 Open Loop Test Circuit



- BYPASS CAPS SHOULD BE LOW ESR & ESL TYPE
- SHORT E/A- & COMP FOR UNITY GAIN TESTING

THE USE OF A GROUND PLANE IS HIGHLY RECOMMENDED

(1) **Status:** For more details on status, see our product life cycle.

(2) **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

(3) **RoHS values:** Yes, No, RoHS Exempt. See the TI RoHS Statement for additional information and value definition.

(4) **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

(5) **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

(6) **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

OTHER QUALIFIED VERSIONS OF UC1856, UC2856, UC2856M, UC3856 :

- Catalog : UC3856, UC2856
- Automotive : UC2856-Q1, UC2856-Q1
- Military : UC2856M, UC1856
- Space : UC1856-SP

NOTE: Qualified Version Definitions:

- Catalog - TI's standard catalog product
- Automotive - Q100 devices qualified for high-reliability automotive applications targeting zero defects
- Military - QML certified for Military and Defense Applications
- Space - Radiation tolerant, ceramic packaging and qualified for use in Space-based application

IMPORTANT NOTICE AND DISCLAIMER

TI PROVIDES TECHNICAL AND RELIABILITY DATA (INCLUDING DATASHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES “AS IS” AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

These resources are intended for skilled developers designing with TI products. You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, regulatory or other requirements.

These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you fully indemnify TI and its representatives against any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI’s products are provided subject to TI’s Terms of Sale, TI’s General Quality Guidelines, or other applicable terms available either on ti.com or provided in conjunction with such TI products. TI’s provision of these resources does not expand or otherwise alter TI’s applicable warranties or warranty disclaimers for TI products. Unless TI explicitly designates a product as custom or customer-specified, TI products are standard, catalog, general purpose devices.

TI objects to and rejects any additional or different terms you may propose.
