

TI *Live!* BATTERY MANAGEMENT
SYSTEMS SEMINAR

JINRONG QIAN

OPENING KEYNOTE

The evolution of the battery management systems seminar

- **In 2004:** 1-day training for 6 engineers on gauges for Inventus (formerly Palladium)
- **In 2008:** 2 parallel tracks: charger and gauge with lab session, 50-60 engineers from BMS customers, distributors and TI FAEs
- **In 2011:**
 - An educational conference for professionals all over the world
 - ~ **150** battery-management experts in attendance
 - 2-3 parallel sessions (chargers, gauges, monitors and protectors)
 - 1:1's between customer and TIers for specific project collaboration
- **2020:** Virtual format and 574 customers attended

Our commitment is to support battery-management engineers and exchange ideas for solving your BMS design challenges

TI's BMS product portfolio

Battery gauge and monitor products

Products

- Gauges
- Monitors and balancers
- Protectors
- Authenticator

Applications

- Industrial: Power tools, garden tools, vacuum cleaner, E-Bike, E-Scooter, medical, ePOS, motor drives, battery packs, energy storage system (ESS)
- Automotive: EV, HEV, eBus
- Personal Electronics: Smartphones, tablets, wearables, portable audio

Battery charger products

Products

- Linear chargers
- Switching chargers
 - Buck with integrated FET
 - Boost/buck-boost with integrated FET
 - Charger controller
 - Inductor-less charger

Applications

- Industrial: Building automation, medical, vacuum cleaners, robots, ePOS, power delivery, power tools, Industrial transport
- Automotive: E-call, smart key fob, backup battery
- Personal electronics: Smartphones, tablets, notebooks, BT speakers & headsets, wearables, accessories.

Industrial

Automotive

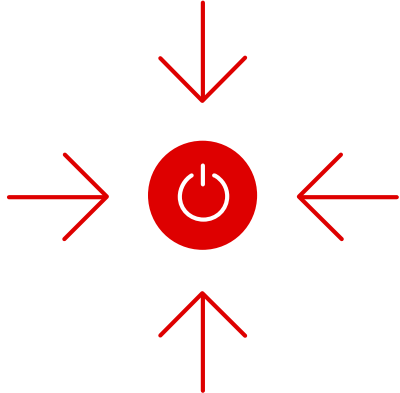

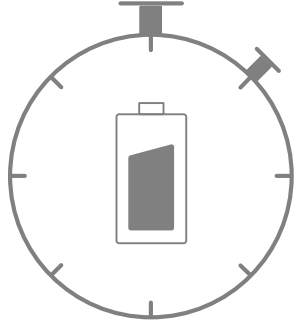

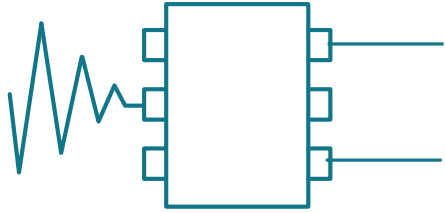

Personal electronics

Key battery management technology trends

- Fast charging - power density.
- Longer battery run-time and cycle life - accuracy and low I_Q .
- Use every “drop of juice” from the battery pack - accuracy and low power consumption.

<h2>Power density</h2> 	<h2>Low I_Q</h2> 	<h2>Low noise & accuracy</h2> 
<p>Achieve fast charging with highest power conversion efficiency to safely and reliably charge the battery with smallest solution size.</p>	<p>Lowering quiescent current to extend battery and shelf life without compromising system performance.</p>	<p>Maximize the battery capacity and cycle life for extending the battery run-time and improving safety.</p>

2021 battery management systems seminar agenda

		Day 1: November 9						Day 2: November 10		
Time (Dallas time)	Length	Keynotes & opening sessions				Time (Dallas time)	Length	Keynotes & opening sessions		
9:00am-9:15am	15 min	Opening keynote & welcome Presenter: Jinrong Qian				9:00am-9:45am	45 min	Achieving high power density and ultra-fast USB battery charging with new charger topologies Presenter: Jing Ye		
9:25am-10:10am	45 min	Why innovation in medicine relies on advanced battery technologies Guest speaker: Gaurav Jain				9:55am-10:40am	45 min	System-level considerations for multi-cell industrial battery packs Presenter: Sid Sundar		
10:20 am-11:05am	45 min	Battery technology development trends Presenter: Yevgen Barsukov				10:50am-11:35am	45 min	More miles, less wires: Revolutionizing automotive battery management with TI wireless BMS Presenters: Mark Ng, Jon Nafziger		
		Chargers	Gauges	Monitors	Automotive monitors			Chargers	Gauges	Automotive monitors
11:15am-12:00pm	45 min	Implementing USB Type-C® and power delivery (PD) for battery charging and sourcing Presenter: Pengzhao Zhu	Gauging techniques for rarely discharged batteries Presenter: Dominik Hartl	Battery gauging for high-cell-count industrial systems Presenter: Xiaodong Cai	48-V battery monitors in xEV BMS Presenter: Dan Torres	11:45am-12:30pm	45 min	Design considerations for battery chargers to achieve the best user experience Presenter: Nick Brylski	Deep dive into TI's Impedance Track™ technology Presenter: Dominik Hartl	Intelligent battery junction box for voltage and current synchronization Presenters: Sudhir Nagaraj, Milos Acanski
12:10pm-12:55pm	45 min	Autonomous solar panel maximum power point tracking with fully integrated buck-boost chargers Presenter: Mike Emanuel	Battery gauging fundamentals Presenter: Eric Vos	Implementing functional safety systems with TI's industrial battery monitors and protectors Presenter: Terry Sculley	xEV battery pack autonomous management in park mode Presenter: Spencer Hu	12:40pm-1:25pm	45 min	A guide to building a low-power charge system of common battery chemistries Presenter: Bill Johns	TI gauges: A step-by-step guide to production Presenter: Damian Lewis	Ask the experts on automotive monitors (Nov 10 session)
1:05pm-1:35pm	30 min	Ask the experts on battery chargers	Ask the experts on battery gauges	Ask the experts on battery monitors	Ask the experts on automotive monitors	1:35pm-2:05pm	30 min	Ask the experts on battery chargers	Ask the experts on battery gauges	None. this track will end at 1:25pm

Additional resources

- For information on our BMS portfolio, go to ti.com/battery.
- The material used during this event will be available on demand under design resources.
- A survey will appear at the end of each session. Please provide feedback on the sessions you attend.
- If you have questions, please post them at e2e.ti.com and our experts will get back to you.
