

**Test Data
For PMP7992
8/12/2013**

Circuit Description

PMP7992 is a non-isolated synchronous flyback converter using the LM5122 for industrial applications. It uses an off the shelf transformer. The benefit of using a synchronous flyback over a SEPIC converter is size. The test report here is for a 12V in 12V out @ 5A of load current. Switching frequency is set to 230 kHz. The efficiency of this design can be significantly improved if a custom flyback transformer is used.

Vin	12V +/-10%
Vout	12V
Iout Max	5A
Fsw	230 kHz

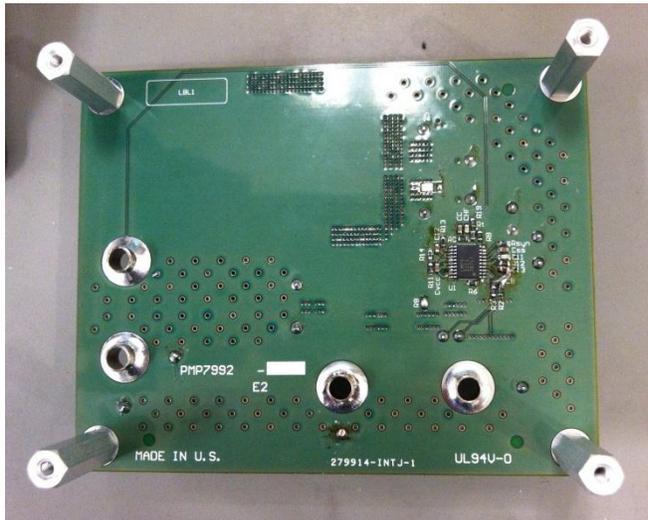

Top Side

Board Dimension 4" x 3.17"

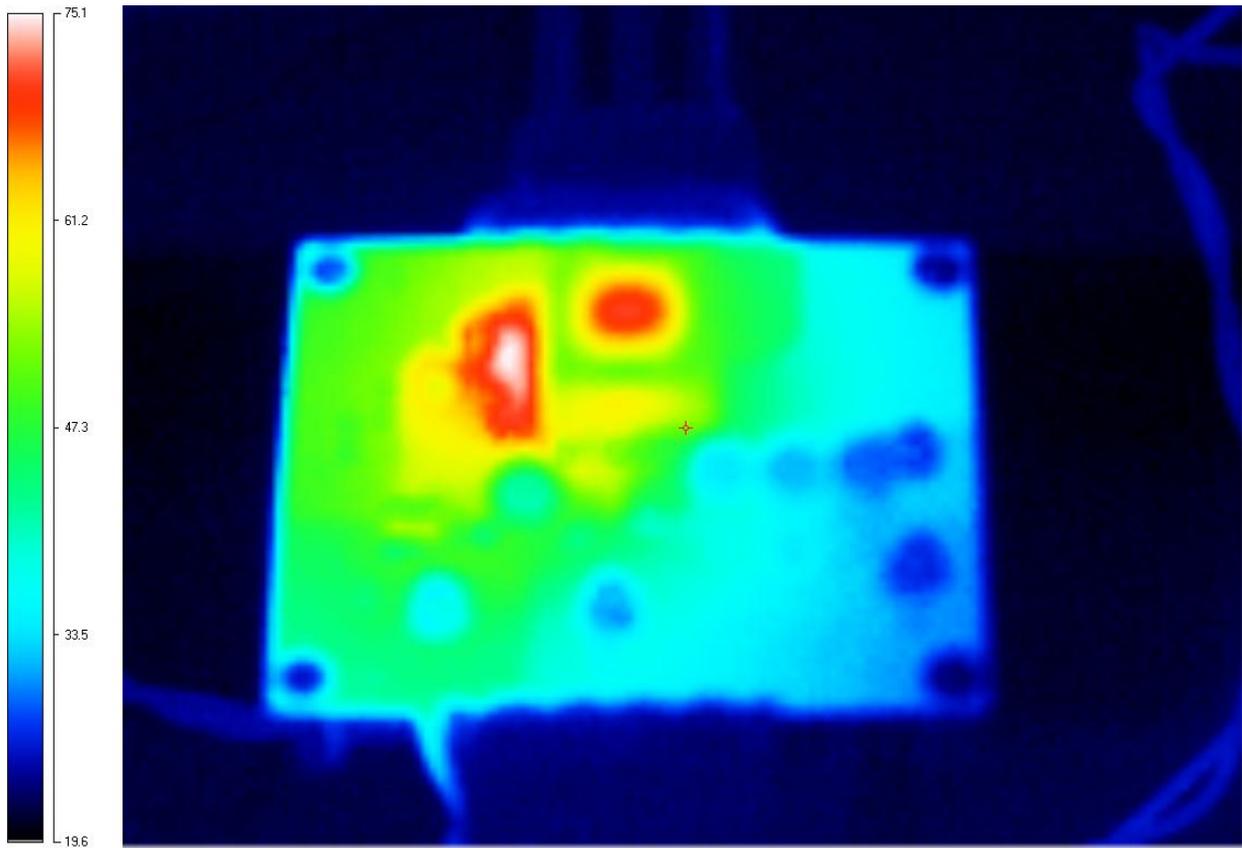

The approximate component area is 2.0" x 2.0"

Bottom Side

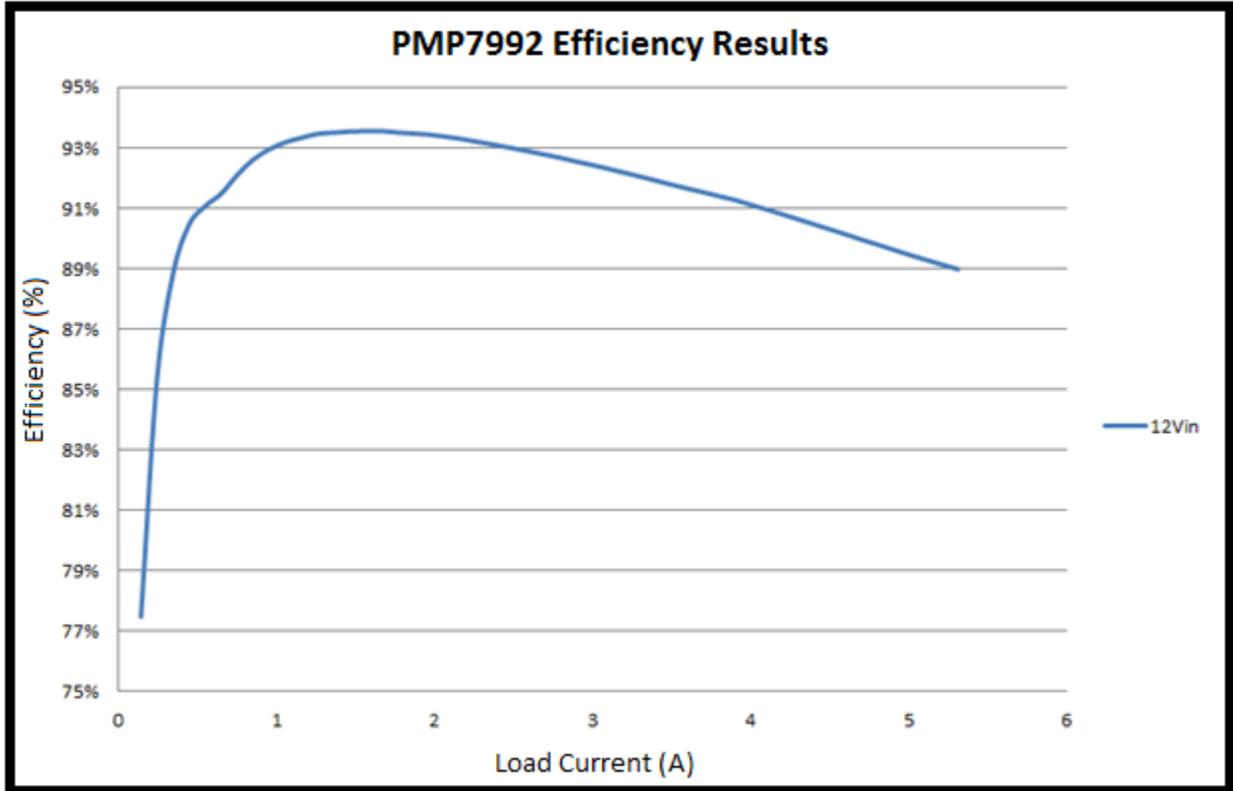

Steady state temperature

This image was taken at steady state, 12V in, 12V out at a load of 5A.

Transformer, MOSFETs and snubber resistors are the hottest items.

Efficiency Curve

Waveforms

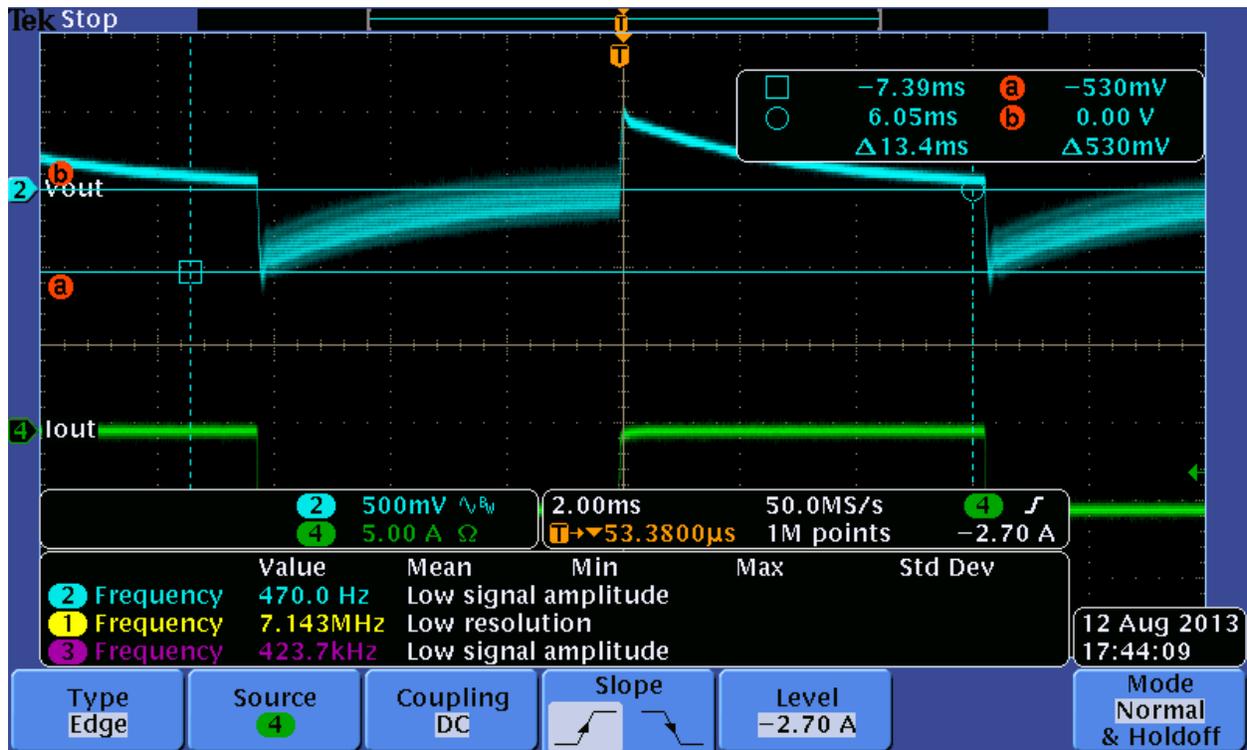

CH2 Vout

12Vin, 12V out @ 5A load current. (260mV p-p Ripple)

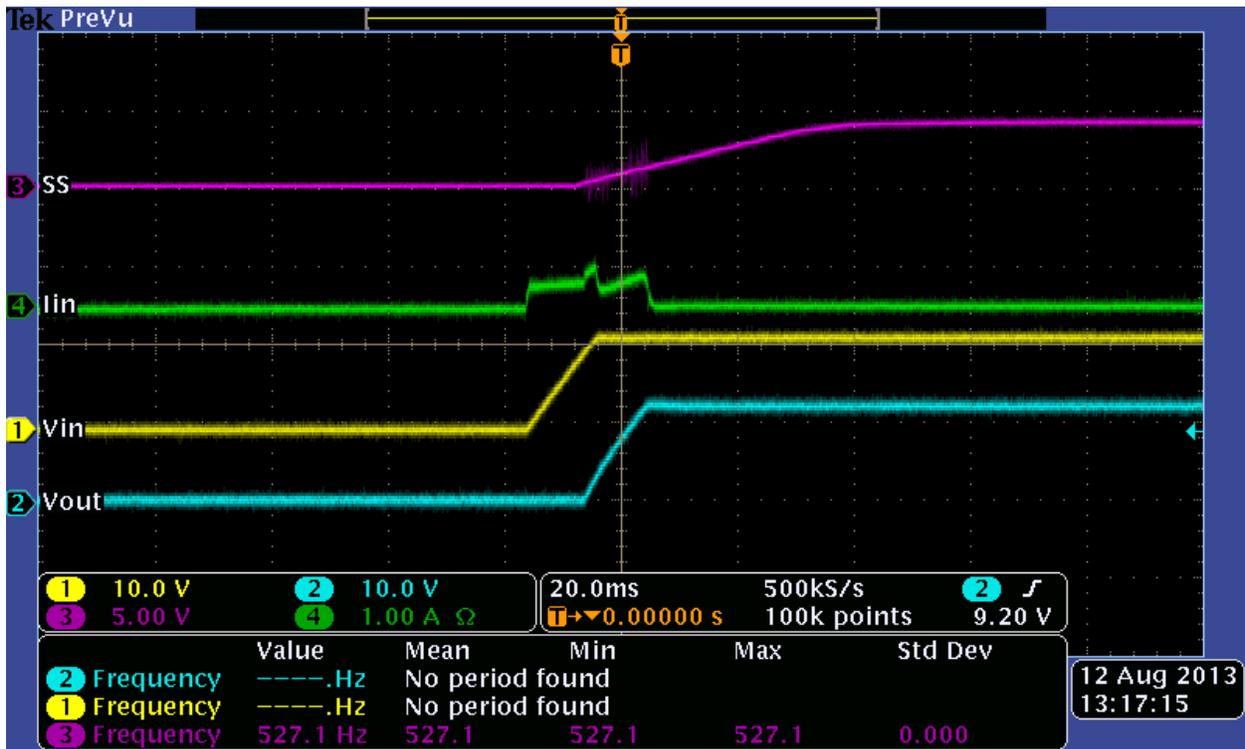

Transient Response Test

12V in @ 2.5A to 5A, 100mA/us Pulse frequency 200 Hz, 50% duty cycle, 12V out.

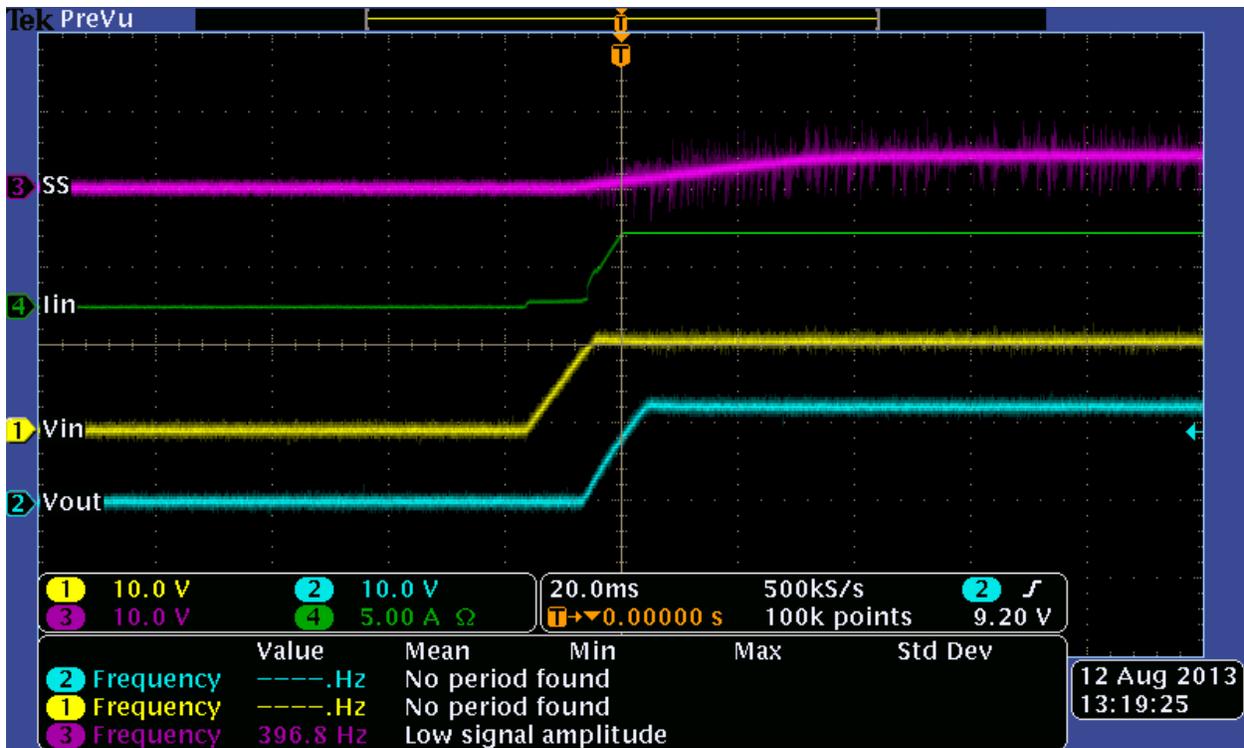

Startup Test

12Vin, 12V out @ no load current.

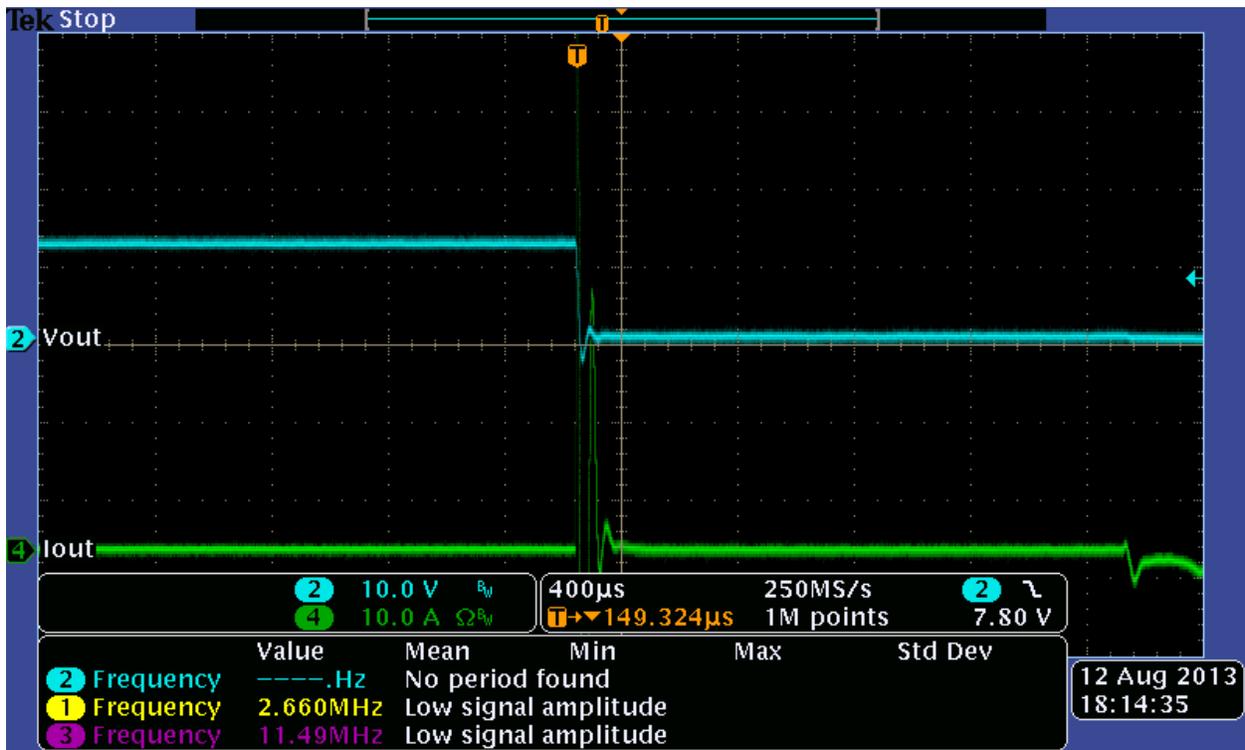

12Vin, 12V out @ 2.4 ohm Load.

Short Circuit Test

Applied to board under the following conditions

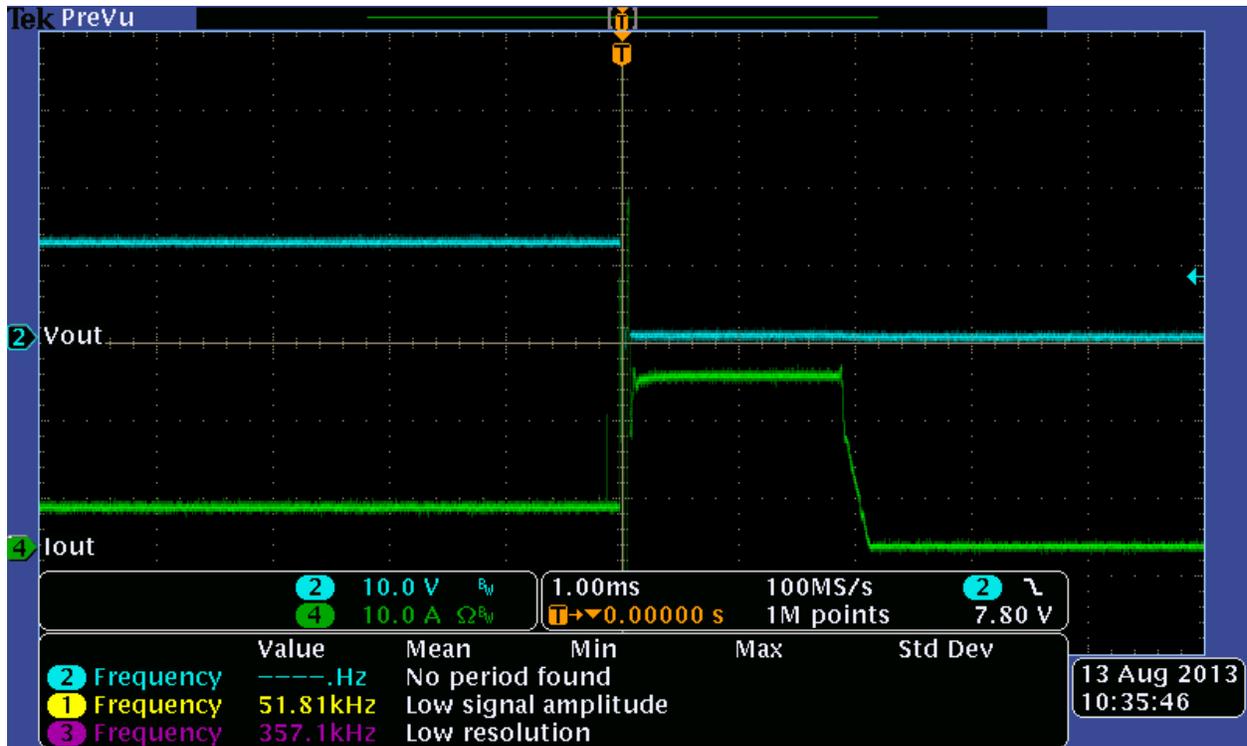

12Vin, 12V out @ 0A load current.

Short Circuit Test

Applied to board under the following conditions

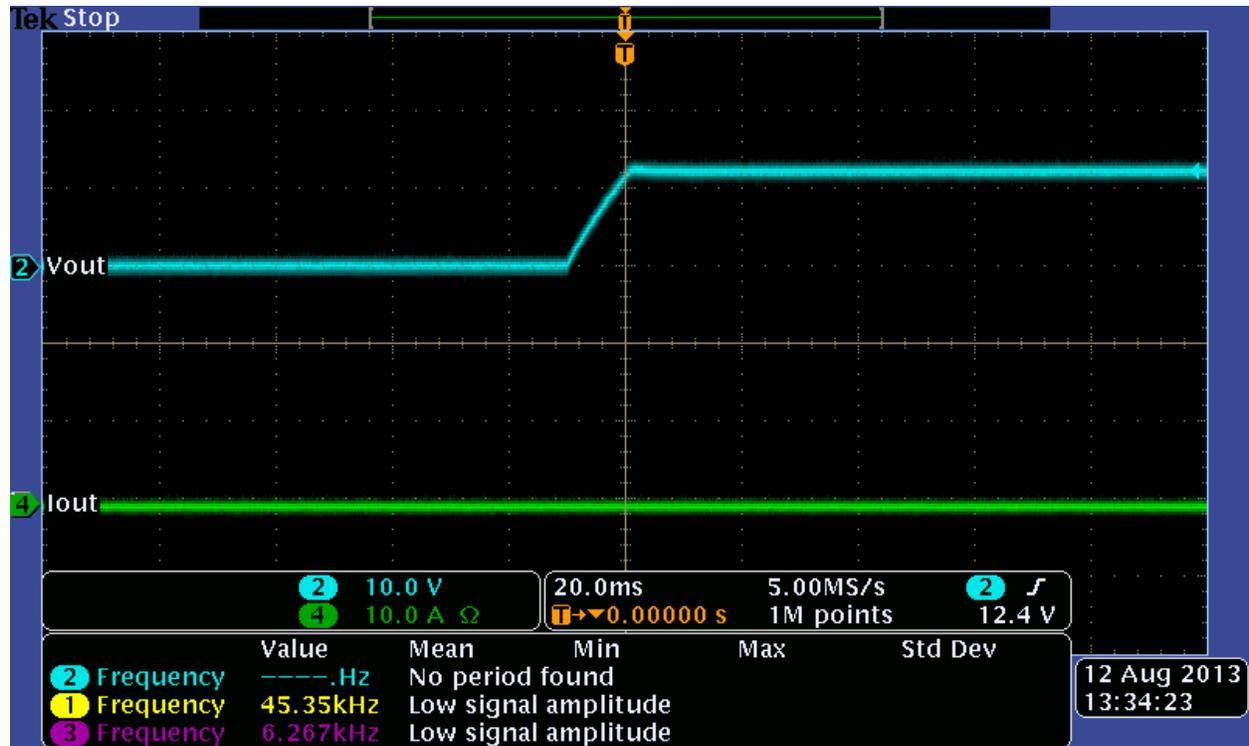

12Vin, 12V out @ 5A load current.

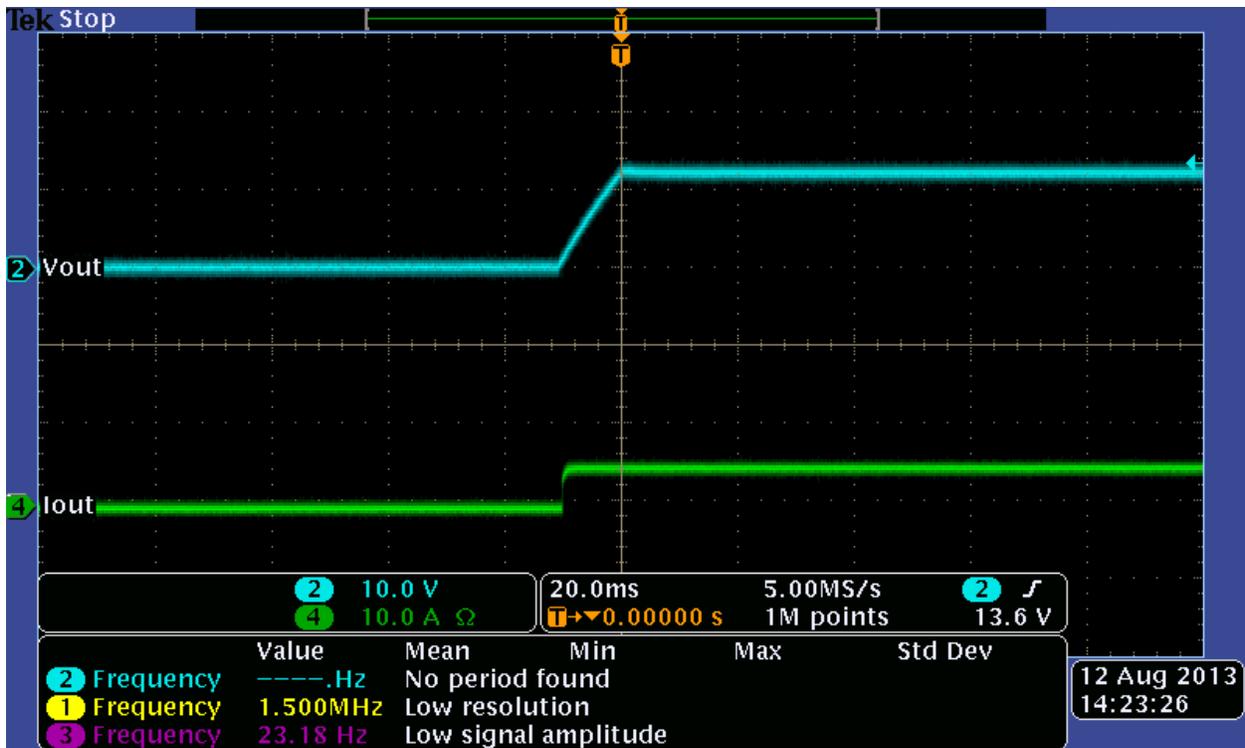

Short Circuit Recovery Test

Applied to board under the following conditions

12Vin, 12V out @ 0A load current.

12Vin, 12V out @ 5A load current.
