3) Efficiency

The efficiency of the converters is shown in the figures below. The input voltage is set to 12V.

6) Load Transients

The transient response of the converters is shown below. The input voltage is 5V. The output current is pulsed from 50% load to full load.

8) Thermal Image

A thermal image of the core voltage, VCCINT, is shown below at a full 40A load current. The input voltage is 12V. All other rails are at 0A during this test.
