```
***************************************************************************
*
* Model Usage Notes:
*
* A. Features have been modelled
*    1. Output Voltage Setting
*    2. Adjustable Soft-start
*    3. Current Limit
*    4. Power Good
*    5. UVLO Protection
*
* B. Features have not been modelled
*    1. Operating Quiescent Current
*    2. Shutdown Current
*    3. Temperature dependent characteristics
*
* C. Application Notes
*    1. The parameter SS has been used to reach the steady state faster.
*       Keep SS = 0 to observe startup behaviour.
*       Keep SS = 1 to observe for faster Steady state.
